How NOT to Learn Programming in 2024

Save for Later

Share

Avoid Asking Questions !? ✗

Don't be shy, asking questions
helps you understand coding
better! 

Never Collaborate or Seek Help! ❌

Team up! Coding is more fun and effective when you collaborate with others. *CodeHype*

Prioritize Games Over Coding ✗

Games are cool, but coding
comes first!

Avoid Procrastination. A green circular icon containing a white checkmark.

Fear of Debugging ✗

Bugs are like puzzles. Embrace the challenge of fixing them; it makes you a better coder! 

Ignore Documentation ✗

Think of documentation as a helpful guide. Read it, and coding will be a breeze.

Copy Paste Mastery! ✗

Copying is easy, but it won't make you a great coder. Be original and create something amazing! ✓

Software Updates?

No Thanks! ❌

Updates are like getting the latest gadgets. They make your coding tools better, don't skip them! 

Embrace curiosity and collaboration in your coding journey. Ask questions, team up, and prioritize coding over distractions. Learn from mistakes, read documentation, be original, and welcome updates. Every challenge is an opportunity to grow, enjoy the learning process!
